WORKING PAPER

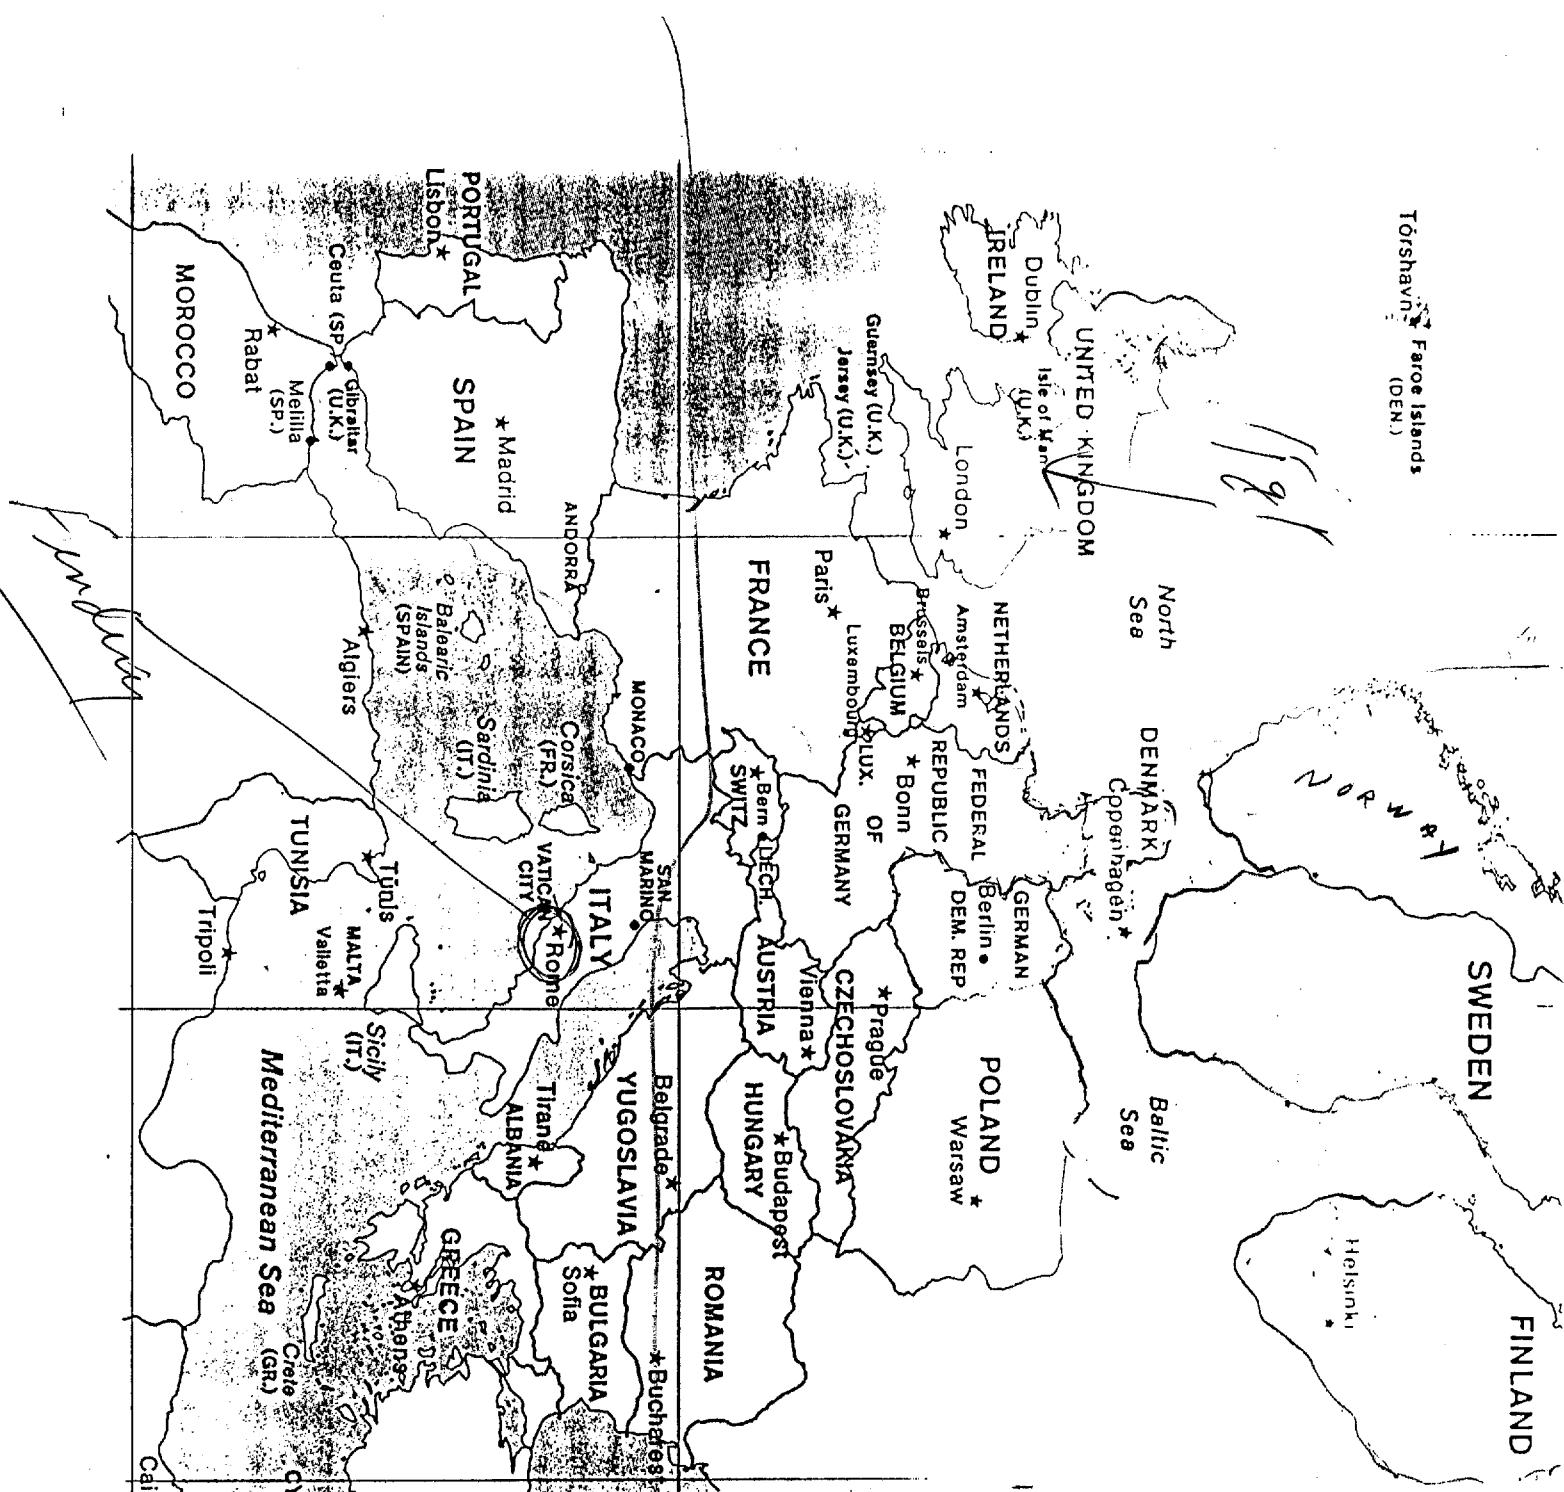

Target #: 6047
Date: 4 June 90
Time: 0920-1505
Viewer: 052
Session: 01

SUMMARY OF INFORMATION:

The target is a structure. It is located in Rome, Italy. There are angles, diagonals, and curves. Something is shiny, pointed and bright, like metal. There is a bluish/red square that has two round fuzzy grey shapes attached. There are people at this structure and bird sounds. There are three fuzzy shapes that seem to form a triangle. There is a cross or an "X" shape. Something about this place is religious, political, scientific, independent, doubt, fearful, indecisive, important, and upsetting.

It seems to be a building with a pointed roof and curved sides. There are a lot of people inside, but only one person seems to be in charge or important, a director. This person is like a teacher, he has certain skills, or like a priest/ minister in a church. He is showing something to the other people. Everyone else is looking. There is a bright round thing which is glowing and/or moving. It is connected to a pointed diagonal. There are at least four, but very many little things in this building. Some are bigger than others and some are smaller. They are not all the same size, but there are very many of them and they are everywhere in this building.

The Strange Scenes Of a Great War

Working among a sea of shells at a British munitions factory

HORACE NICHOLLS. 1916

World War I marked the first wide use of immensely destructive new weapons, including tanks and poison gas. The big guns

that fired over the trenches used shells like these, mass-produced to meet the needs of massive conflict.
